SUMMARY

Full-stack engineer with 6+ years of experience shipping production mobile apps (React Native, Expo) and web platforms (React, Next.js, Laravel, Ruby on Rails). Delivered features for gig-work, car-rental and travel-booking products used across Singapore, Indonesia and Malaysia. Strong on maintainability, automated testing, CI/CD and release engineering. Experienced in remote work with distributed teams, and open to any time zone, including night-shift overlap with US, European and Middle Eastern teams.

SKILLS

Languages	TypeScript, JavaScript, PHP, Ruby, Python, HTML, CSS
Mobile	React Native, Expo (EAS, Expo Router), Redux, Zustand, TanStack Query, Firebase, CodePush/OTA updates, Fastlane, native modules
Web	React, Next.js, React Router, Inertia.js, Tailwind CSS, Bootstrap, React Hook Form, Zod
Backend	Laravel, Ruby on Rails, Node.js, REST APIs, PostgreSQL, MySQL, Sidekiq, AWS S3, Cloudflare R2
Quality & DevOps	Jest, React Testing Library, Maestro (E2E), Storybook, GitHub Actions, Docker, Sentry, Firebase Crashlytics, feature flags
Practices	Clean architecture, code review, i18n (multi-language, multi-currency), mobile security (SSL pinning, secure storage), Agile, LLM API integration

EXPERIENCE

Full Stack Developer - Aptus Technologies Pte Ltd (Jod) May 2025 - Present

Singapore (Remote)

- Built the careers module end to end across a Ruby on Rails API and a React Router web app: certificates, education, profile-setup wizard and job bookmarks, with validation and role-aware redirects.
- Delivered frontend web features for jodapp.com covering core business operations, admin workflows and responsive interfaces; integrated AWS S3 for secure file management.
- Applied SEO best practices to improve search visibility and organic traffic.
- Maintain the React Native app: fixed an iOS launch crash by adopting the UIScene lifecycle, deferred startup work with *requestIdleCallback* to keep the main thread responsive, and shipped internal ads campaign placement.

Mobile Developer - Aptus Technologies Pte Ltd (Jod) Nov 2023 - May 2025

Singapore (Remote)

- Shipped roadmap features for thousands of active gig workers (clock-in/out, job updates, deep linking) with offline-capable synchronization on iOS and Android.
- Reduced unnecessary REST API calls by optimizing Redux and Context API usage; refactored legacy modules and hardened error handling to cut crashes.
- Added SSL pinning and secure storage to strengthen mobile security.
- Improved CI/CD reliability with automated tests, quality checks, code reviews, release workflows and versioning.

Freelance Mobile Developer (React Native) - PT. Indo Teknologi Cemerlang Jan 2022 - Jul 2026

West Jakarta, Indonesia (Remote) - Get&Ride car rental (customer and driver apps, Bali and Singapore)

- Delivered rental flows, order management, real-time chat, driver assignment and order tracking on iOS and Android; cut app startup time by 30% through bundle splitting and asset caching.
- Led the rewrite of the customer app on Expo (SDK 54) and Expo Router with a feature-based architecture, TanStack Query and Zustand (largest contributor, 577 of 1,007 commits). Added Jest tests, Maestro E2E flows, and a tag-based GitHub Actions pipeline that separates native builds (EAS) from over-the-air updates.
- Built airport-transfer and car-charter booking flows, document verification, multi-language support and multi-currency pricing behind feature flags.
- Agreed API data structures early with backend teams, which stabilized integrations and releases.

Frontend Developer - PT Solusi Teknologi Nusantara Apr 2022 - Apr 2023

West Jakarta, Indonesia (Remote)

- Built responsive, mobile-first UI components with React.js and Tailwind CSS; refactored legacy components into modular hooks.
- Improved rendering performance on key pages for low-end devices.

Freelance Mobile Developer - PT Sentra Aktiva Indonesia Dec 2021 - Mar 2022

West Jakarta, Indonesia (Remote)

- Built push notifications, real-time updates and deep linking; improved stability with better caching and data-fetching strategies.

Fullstack Web Developer - CV Twin Group Jul 2020 - Jan 2022

Banjarbaru, Indonesia (On-site)

- Built full-stack modules with React.js, Laravel and MySQL for service tracking, stock monitoring and financial reporting.
- Improved backend-frontend communication for a 25% improvement in system performance; automated report generation, cutting manual processing time by 40%.

SELECTED PROJECTS

NatCamp - Campsite & Homestay Booking Platform (Freelance) natcamp.com

Laravel, React, Inertia.js, TypeScript, PostgreSQL, Tailwind CSS, GitHub Actions

- Full-stack development and end-to-end QA on a Malaysian marketplace: admin roles and permissions, work-queue dashboard, versioned legal documents with recorded acceptances, and Malaysian public and school holiday pricing.
- Made the platform multi-language (EN, ID, MS) and multi-currency; moved the test suite and CI to PostgreSQL and PHP 8.4.

KBM Digital - Learning Management for a Mosque Education Center kbmdigital.my.id

Laravel, Next.js, TypeScript, PostgreSQL, Docker, Cloudflare R2, GitHub Actions

- Designed and built the system from scratch: attendance, classes, curriculum, finance, announcements, PDF/Excel export, and role-based access control.
- Added an AI assistant that extracts attendance from free text through a provider-agnostic driver (Anthropic or OpenAI), and WhatsApp notifications; deployed with Docker on a VPS with CI/CD.

Grinstock - Inventory Management SaaS grinstock.com

Next.js, TypeScript, Node.js, Prisma, PostgreSQL, Docker

- Built a multi-role inventory SaaS with real-time stock tracking, order management and RBAC; containerized it, set up CI/CD, and run it on a VPS with SSL and a reverse proxy.

AI Clipper - CLI that turns long videos into 9:16 clips Personal project

Python, faster-whisper, OpenCV, yt-dlp, FFmpeg, LLM APIs

- Transcribes a video, asks an LLM (Gemini, OpenAI, Claude or local Ollama) for highlights, then renders vertical clips with speaker-following reframing and burned-in captions.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Information Systems - Universitas Terbuka (Open University) 2020 - 2024

Coursera: React Native; Mobile Development and JavaScript; Principles of UI/UX Design; Version Control; Android and Kotlin courses.

Languages: Indonesian (native), English (professional working proficiency)
